PART 1:  INTRODUCTION

Emergencies are defined as situations or impending situations caused by forces of nature, a disease or other health risk, an accident or an intentional act that constitutes a danger of major proportions to life and property. Emergencies affect public safety, including the health, welfare and property of residents, businesses and visitors, as well as the environment and economic health of the Town of Aurora.

The population of the Town of Aurora as of December 30, 2016 is 55,445 residents.

In order to protect residents, businesses and visitors, the Town of Aurora requires a coordinated emergency response by a number of agencies under the direction of the Municipal Emergency Control Group (MECG). These are arrangements and procedures that are distinct from the normal, day-to-day operations carried out by emergency services.

The Town of Aurora Emergency Management Program Committee developed this Emergency Response Plan (Plan). The Incident Management System (IMS) has been adopted in this Plan to define the basic command structure and to identify roles and responsibilities to ensure effective management of an emergency.

Every official, municipal department and agency must be prepared to carry out assigned responsibilities in an emergency. The Plan has been prepared to provide key officials, agencies and departments of the Town of Aurora with important emergency response information related to:

- Arrangements, services and equipment; and
- Roles and responsibilities during an emergency.

In addition, it is important that residents, businesses and interested visitors be aware of its provisions. Copies of the Town of Aurora Emergency Response Plan may be viewed at the Town Hall, Library and on-line at www.aurora.ca. For more information, please contact:

PART 2: AIM

The aim of this Plan is to make provision for the extraordinary arrangements and measures that may have to be taken to protect the health, safety, welfare, environment and economic health of the residents, businesses and visitors of the Town of Aurora when faced with an emergency.

It enables a centralized, controlled and coordinated response to emergencies in the Town of Aurora, and meets the legislated requirements of the *Emergency Management and Civil Protection Act*, R.S.O. 1990, c. E.9, as amended.

Emergencies can occur within the town of Aurora. The Town uses a Hazard Identification Risk Analysis methodology in conjunction with the Regional Municipality of York. Aurora’s top emergency risks include:

1. Human caused emergencies involving information technology disruption from cyber attacks
2. Natural caused emergencies from severe weather including tornados, windstorms and ice storms along with severe summer storm-flooding
3. Technological emergencies involving natural gas
4. Technological emergencies involving transportation of hazardous material via railway and roads

For further details, please contact the Community Emergency Management Coordinator.

Incident Management System (IMS) Function Descriptions

The Incident Management System (IMS) is a model for command, control, and coordination of an emergency. It provides a way of coordinating the efforts of agencies and resources as they work together toward safely responding to an emergency incident. IMS consists of five key functions: Command (EOC Management), Operations, Planning, Logistics, and Finance/Administration. Descriptions of each function are provided below.

1. Command (EOC Management)

The EOC Management section has overall authority for the control and direction of the emergency response. EOC Management has three (3) supporting functions: Risk Management/Legal (ensures good risk management practices are applied throughout the emergency; provision of legal advice), Liaison (coordination of agencies involved in the response), and Information (dissemination of information to the media and the public).

2. Operations

The Operations section coordinates the operational requirements of the response, directs resources and equipment, as required, to fulfill emergency management requirements.

3. Planning

The Planning section gathers information critical to the incident in order to develop, disseminate and evaluate incident action plans.

4. Logistics

Logistics arranges for and coordinates all material, services, equipment and resources required to manage and resolve the emergency. Logistics tracks usage and current locations of these same items.

5. Finance/Administration

Finance/Administration performs duties related to administrative, financial and compensation and claims, specific to the emergency. This includes keeping track of incident-related costs, staff compensation and claims.
**Emergency Operations Centre (EOC)**
The location of the Town of Aurora's primary and alternate Operations Centres are detailed in Annex B.

The Emergency Operations Centre (EOC) can be activated for any emergency for the purposes of managing an emergency, by maintaining services to the community and supporting the emergency site.

**Municipal Emergency Control Group (MECG)**
The emergency response will be directed and controlled by the Municipal Emergency Control Group (MECG), a group of officials, as appointed by municipal council, who are responsible for coordinating the provision of the essential services necessary to minimize the effects of an emergency on the community. Meetings will be kept as brief as possible thus allowing members to carry out their individual responsibilities. The Town Clerk will maintain a status board and maps, which will be prominently displayed and kept up to date.
