PROGRAM OVERVIEW

What is the Architectural Salvage Program?

The Program enables the salvaging and re-use of architectural materials of significant cultural heritage value. The Program facilitates the appropriate re-use and conservation of materials at the discretion of the Heritage Advisory Committee in a manner that is sustainable, operational, accessible to the general public, and consistent.

Please refer to the Architectural Salvage Program Guide for details regarding Program Guidelines, Policies and Criteria.

Purpose

The purpose of the Program is to encourage the adaptive re-use of architectural materials of significant cultural heritage value. These materials and architectural elements are managed by the Heritage Advisory Committee in order to facilitate the adaptive re-use and conservation of heritage materials instead of being deposited as landfill material.

As circumstances arise where it is not possible to conserve a heritage resource, the Program outlines clear and objective guidelines for mitigating these situations.

The purpose of salvaging heritage building materials is to preserve portions or features of buildings or structures which have significant historical, architectural, or cultural value and divert them from becoming landfill material. Please note that the Program is a last resort *only* after the following options have been considered by the Town and the property owner:

- a) Retention of the entire or part of the heritage resource on the original site; and
- b) Relocation of the entire or part of the heritage resource to a different site.

Objectives

The underlying objectives of the Program are:

- a) To develop a process for acquiring salvaged heritage materials from properties proposed for demolition;
- b) To consider options for encouraging property owners to donate salvageable materials to the Town when feasible and to discourage them from disposing of significant materials in local landfills;
- c) To develop guidelines and criteria in managing the receiving and distribution of materials; and
- d) To ensure the salvaged materials are received and distributed in a manner which is operational, sustainable, available to the general public, and consistent in consultation with the Heritage Advisory Committee.
