

# Macramé Keychain

## Materials Needed:

- Key Ring
- 10 – 12 pieces of macramé cord – 30 cm in length 1 colour
- 10 – 12 pieces of macramé cord – 30 cm in length in another colour
- 1 piece of cord – 60 cm each in length
- Scissors
- Wire Brush

## Instructions

1. Fold the longest piece of cord in half. Knot it around the keychain by taking the looped end, threading it under the keychain and pulling the bottom ends up, and through.

2. Take one of the shorter pieces in your first colour. Fold it in half, and place the looped end under the cord on the keychain (this will be your spine). Take another piece of the same colour, fold it in half. Thread the looped end up and under the other string loop, over the spine. Take each end, and pull. Repeat with the same colour on the other side. Choose your colour pattern, and rotate as you see fit.

3. Trim the ends to a V shape. Use a wire brush to brush out the ends. You are done!
