

MATH - DIVISION

Solve these division problems.

$$2 \text{ circles} \div 2 \text{ triangles} = 1$$

$$6 \text{ triangles} \div 3 \text{ pentagons} = \square$$

$$6 \text{ circles} \div 2 \text{ triangles} = \square$$

$$2 \text{ triangles} \div 1 \text{ circle} = \square$$

$$4 \text{ pentagons} \div 2 \text{ circles} = \square$$
