Operational Services Department
Drinking Water Policy

The municipality of The Town of Aurora owns, maintains and operates the Aurora Class II Water Distribution System as described in the annually published Ministry of the Environment, Conservation and Parks water quality summary report.

The water supply is provided by the Regional Municipality of York. Once the water enters the distribution system, then water quality control and responsibility becomes a partnership shared with The Town of Aurora.

This water quality policy speaks to the roles and responsibilities provided by The Town of Aurora.

The Town of Aurora is committed to:

1. Ensuring a consistent supply of safe, high quality drinking water, through a commitment to system maintenance;
2. Maintaining and continually improving its quality management system, through a commitment to Aurora's consumers to provide safe drinking water, and;
3. Comply with applicable regulations and legislation.

The Town of Aurora strives to accomplish its goals through staff dedication, staff development and training, by continuing to be an active participant in industry associations and by promoting resource conservation through public awareness.

The Town of Aurora further supports this policy through its corporate Strategic Plan Goal: "Supporting an exceptional quality of life for all."

Town of Aurora Water Distribution System, Top Management:

Allan D. Downey
Director of Operations
